the waxing professionals

Waxing Tips!

BEFORE: Make sure that the area which you intend to wax does not have any wounds, skin rashes, acne.

Do not shave the desired area before waxing. Your hair should be at least 6-8 mm long. Any hairs shorter than that will not get treated.

AFTER: Never moisture or exfoliate the treated area as this can lead to skin irritations.

The use of an after wax cream helps soothe the area and Ingrostopper helps reduce ingrown hairs.

Eyebrows!

A great set of eyebrows can really frame the eyes and give the face a real lift. Here is a procedural guideline that we follow:

- Discuss shape options.
- The therapist will powder well.
- Trim front of eyebrows on an angle.
- Wax underpart of both eyebrows.
- Wax separately the front of the eyebrow.
- Massage soothing lotion into eyebrows.
- Start shaping with tweezers.
- Check shape! You're off!
